

TOGETHER.
FOR ALL.

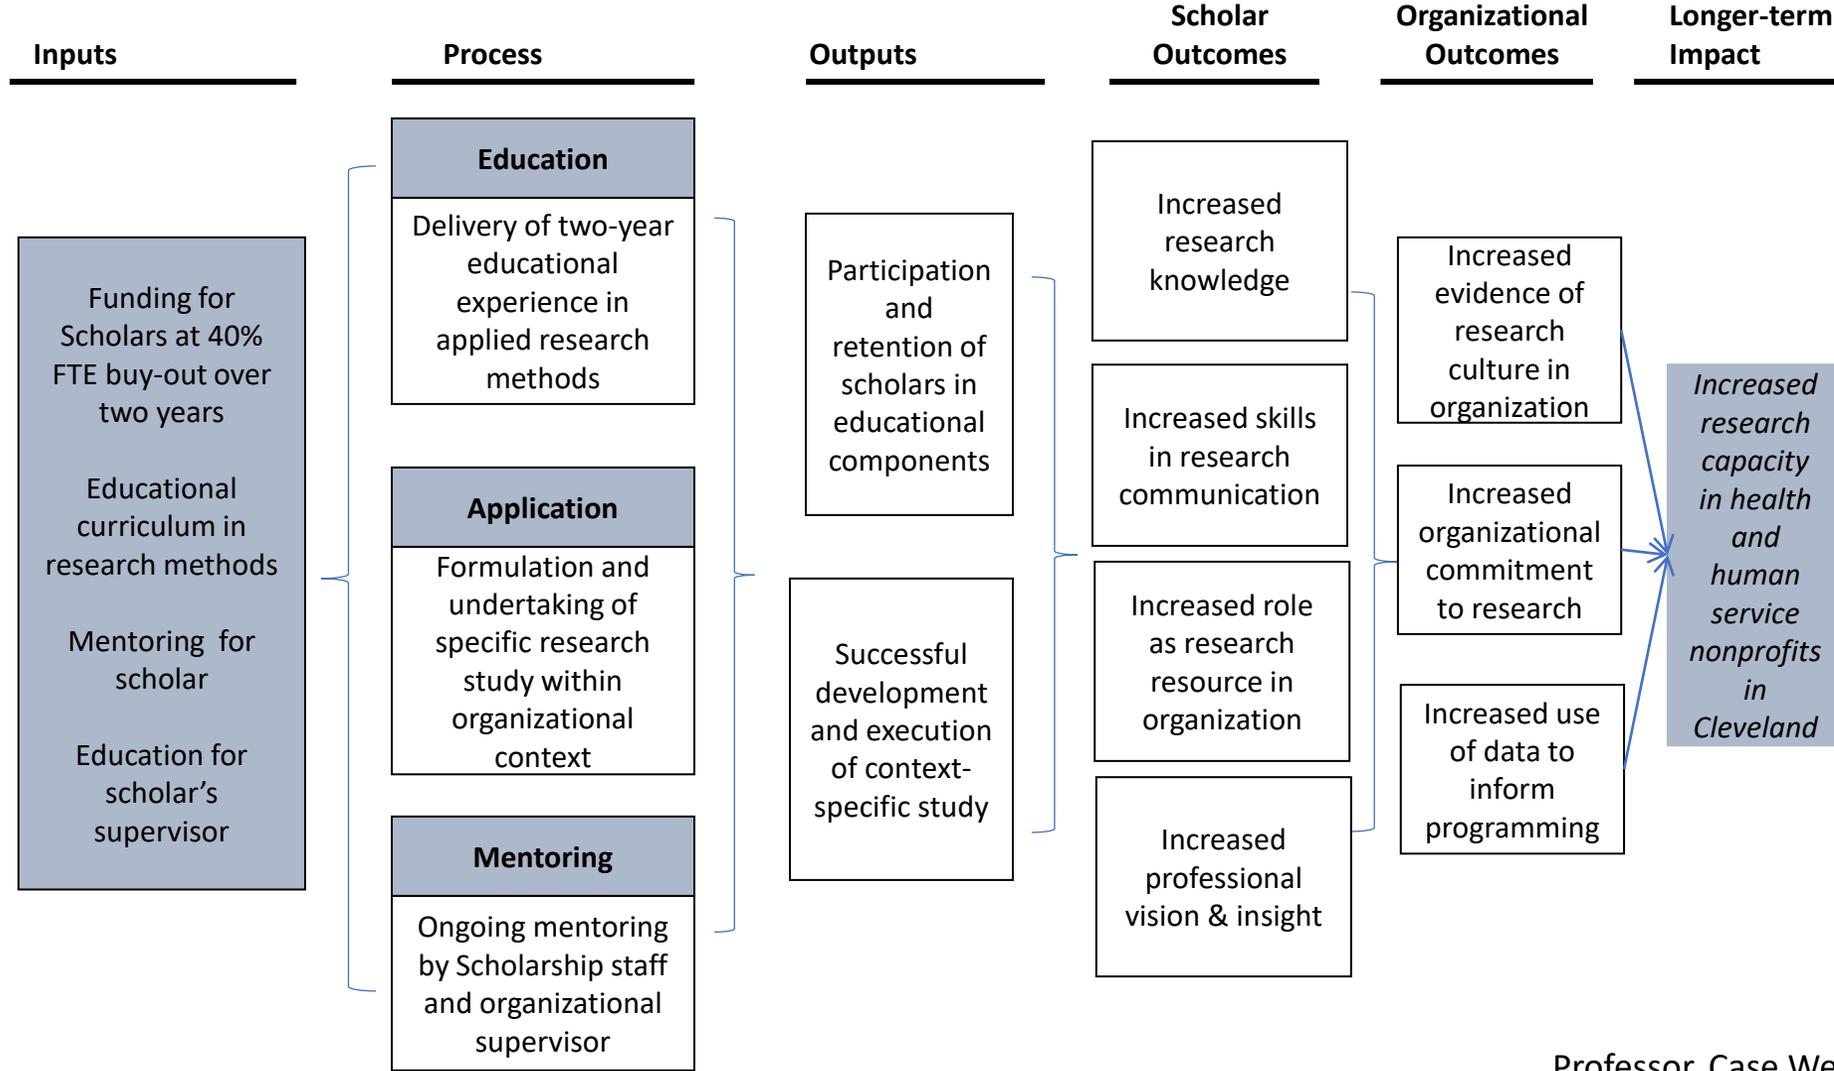

Julie Merker
CRSI Cohort #1

January 2013 – December 2014

CRSI Logic Model

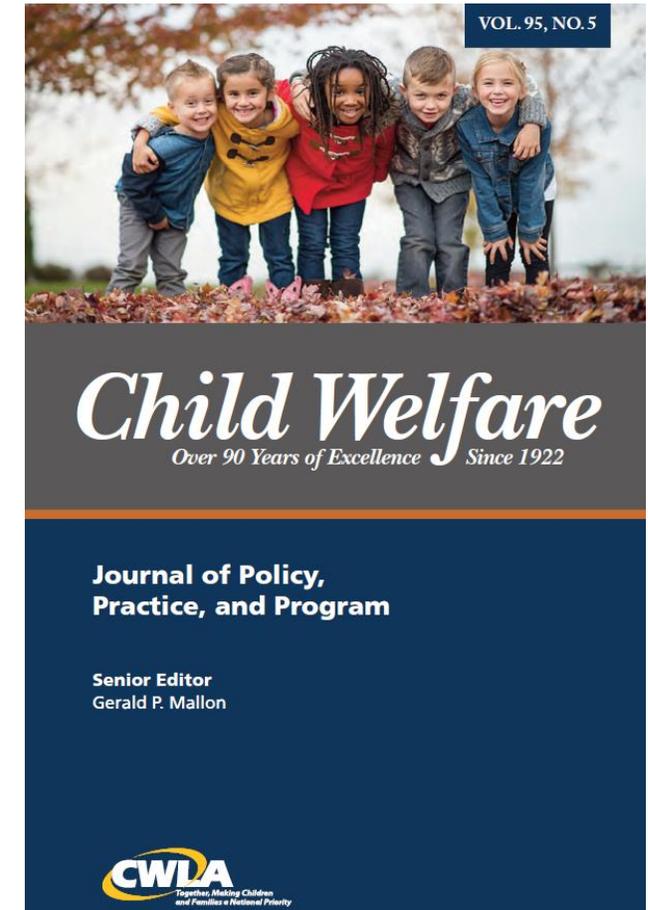

Robert L. Fischer, PhD
Professor, Case Western Reserve University

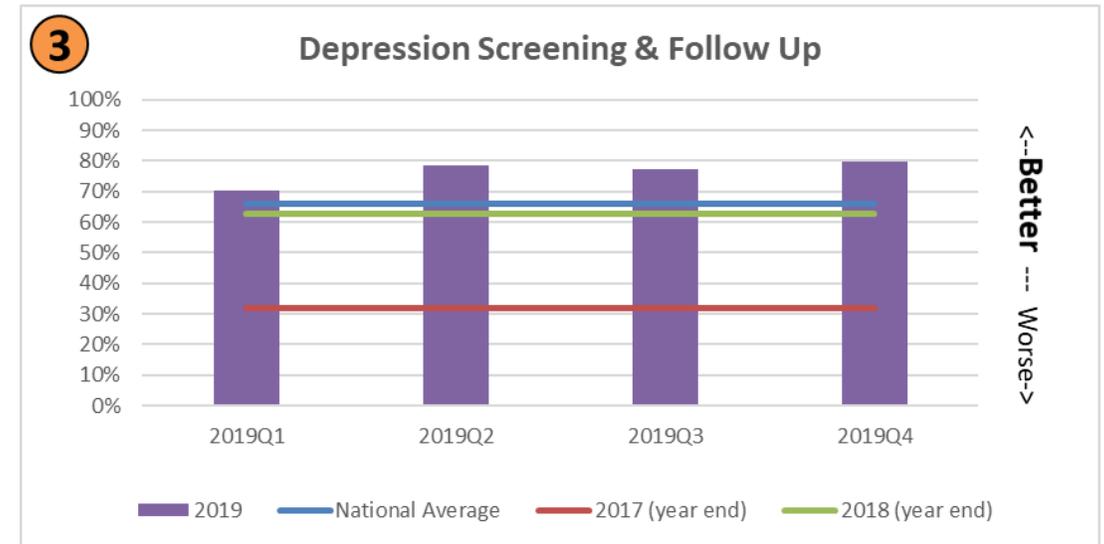

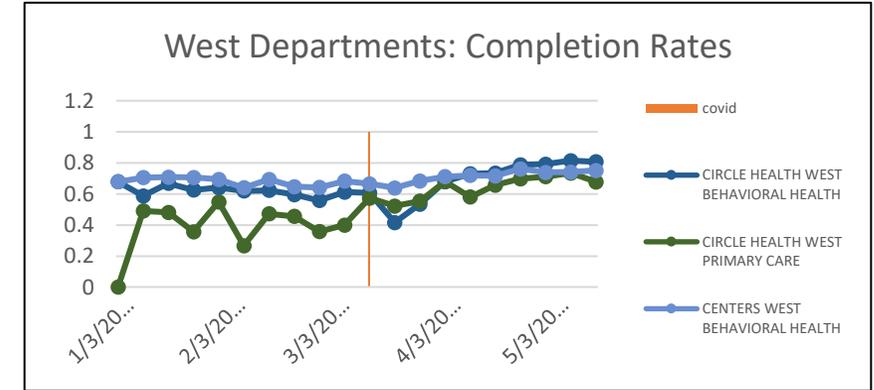

Community Research Scholar Initiative

-Project Background-

- STUDY TITLE: Prevalence of Chronic Illness Among Youth with Mental Health Diagnoses
- SPECIFIC AIMS: Better understand the relationship of physical and mental health in youth; inform policy around the integration of physical and mental health delivery systems
- METHODS: Exploratory study utilizing data-mining of the EMR
- RESULTS:
 - Chronic conditions were likely under reported because 76% of clients did not report any.
 - Asthma was the most common chronic condition (20%). This was higher than national trends, but in line with state and county trends at the time.
 - Rates of being overweight or obese were higher than national averages.

The Centers & Circle Health – Data Journey

Research Projects & Partnerships

- Internal Institutional Review Board: Cross-disciplinary group that reviews all proposed research and quality improvement projects prior to implementation
 - Uses the BRACE Toolkit to facilitate discussion between The Centers/Circle and the academic partner
- Approaches to CHC Implementation of SDH Data Collection and Action (ASCEND)
 - Kaiser Permanente Center for Health Research
 - OCHIN, Inc.
- Multi-Level Facilitation of Long-Acting Injection Use (MAP)
 - University of Texas Health Sciences Center
 - Case Western Reserve School of Medicine
