

Community Based Research Network (CBRN)

**RESEARCH OPPORTUNITIES:
PIPELINES & TOOLS FOR INVESTIGATORS
AT METROHEALTH**

September 10, 2020

Noreen Roman, MBA, MT(ASCP)

Manager, Clinical Research Unit Operations

Program Manager, Case Western Reserve University Network Capacity

Point of Contact, Trial Innovation Network Case Western Reserve CTSC

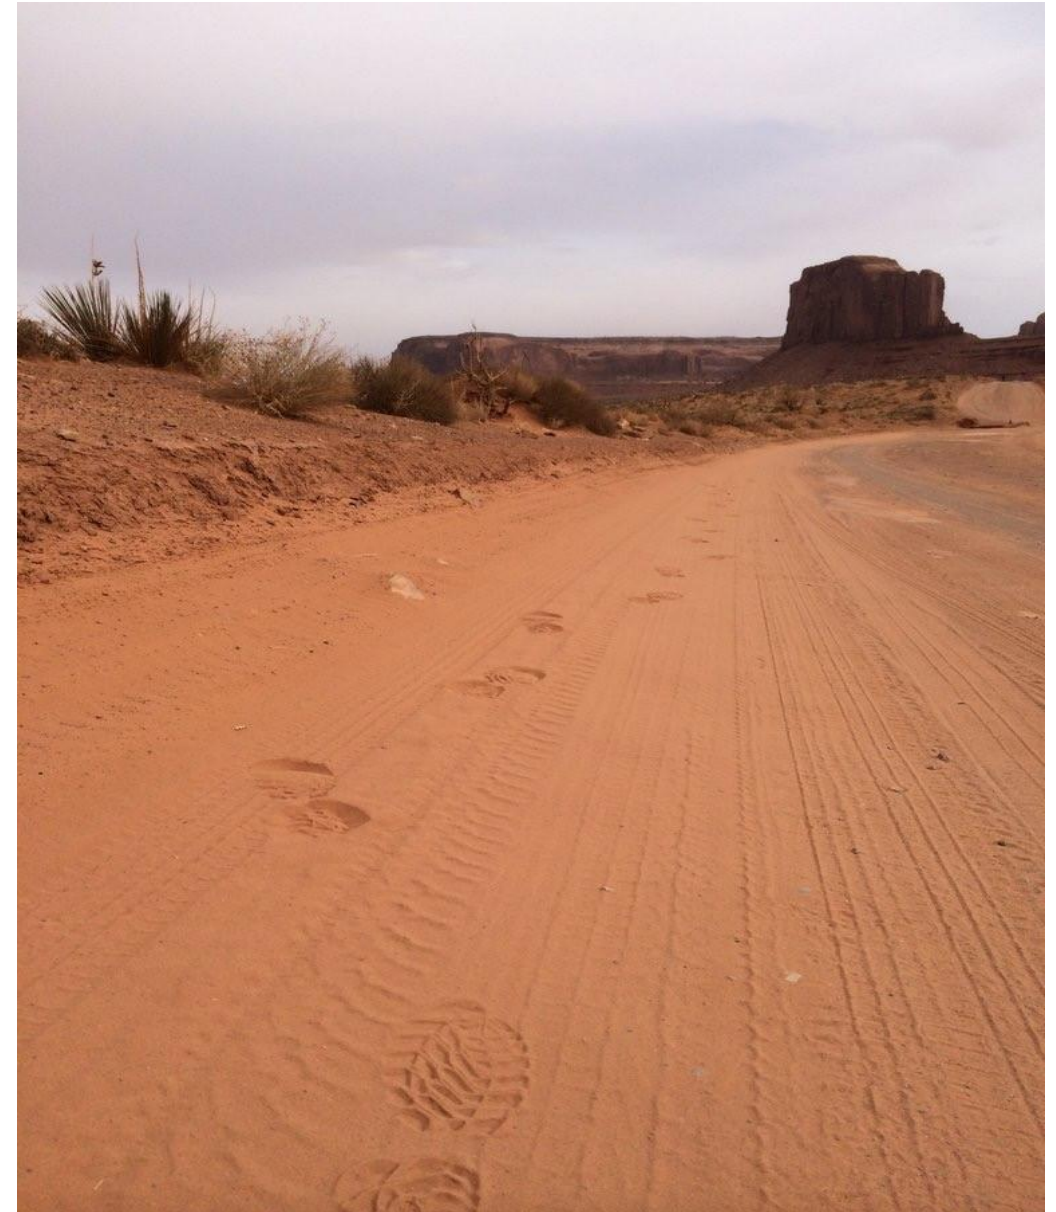

Overview

1) Pipelines & Opportunities for Clinical Researchers

- i. Federal
- ii. Industry
- iii. Foundation/Community

2) Resources for MetroHealth Investigators

3) Research in a COVID-19 world

Pipelines for Clinical Research - FEDERAL

- Federal Notices & Newsletters
- [Case Clinical and Translational Science Collaborative \(CTSC\)](#) – \$48M multi-institutional (CCF, MH, UH Clinical and Translational Science Award)
 - Core Support for Research: Regulatory, Informatics, Network Capacity Hub Research Capacity, Community and Collaboration, etc...
 - Multiple CTSC Monthly Pilots - \$10,000
 - 6 CTSC Annual Pilots - \$50,000
 - [Trial Innovation Network \(TIN\)](#)

Pipelines for Clinical Research - FEDERAL

Clinical and Translational Science Awards

Ohio has 3 CTSA Awards!:

- CWRU
- Ohio State
- Cincinnati Children's

Pipelines for Clinical Research - FEDERAL FUNDING

- [Case Clinical and Translational Science Collaborative \(CTSC\)](#) – \$48M multi-institutional (CCF, MH, UH Clinical and Translational Science Award)
 - Core Support for Research: Regulatory, Informatics, Network Capacity Hub Research Capacity, Community and Collaboration, etc...
 - Research Education and Support
 - Newsletters and FOAs
 - CTSC Monthly Pilots - \$50,000
 - CTSC Annual Pilots - \$10,000
 - [Trial Innovation Network \(TIN\)](#)

Pipelines for Clinical Research - FEDERAL

WELCOME!

The Trial Innovation Network is a collaborative national network that focuses on operational **innovation, excellence and collaboration** and will leverage the expertise and resources of the CTSA Program.

[NETWORK LOGIN](#)

COVID-19 UPDATE

The Trial Innovation Centers (TICs) and Recruitment Innovation Center (RIC) remain operational during the ongoing COVID-19 pandemic. Patients still need access to clinical trials and studies that may benefit them. Helping researchers plan these future trials is a TIN priority. CTSA Institutions have implemented guidelines to protect research participants, research personnel, and the larger communities from risk of infection from COVID-19.

CTSA investigators may find helpful information on the [CLIC Website](#) and Discussion Forums here: [CTSA Program and Response to COVID-19 Discussion Forum](#).

INVESTIGATORS

submit your proposal

Hear from us within 5 business days.

TRIAL INNOVATION NETWORK
Operational innovation, excellence and collaboration.

The Trial Innovation Network continues to accept new proposals! Click the button below to get started.

Toolbox

TIN Toolbox

Trial Innovation Network accepts submissions from CTSAs and reputable community health partners and provides them as a free resource to the research community. The materials on this site are designed primarily for the CTTSA Program staffs and institutions participating in the Trial Innovation Network. Other parties conducting engagement, recruitment, and retention activities for clinical trials and multi-site studies are welcomed to adopt these resources for local use as well. These resources are intended to provide a variety of information that includes the best evidence-based recruitment information and some that may be evidence-informed. These materials are not meant for the general public. Some materials may not be suitable for adoption in isolation of a comprehensive engagement, recruitment, and retention plan.

If you would like to submit a resource to be considered for public sharing, please be advised that the toolbox resources are collected through an open submission portal and reviewed by an internal review committee for content screening and light-touch editing before becoming accessible to the broader network.

The posting of shared resources to the Trial Innovation Network Toolbox is not an endorsement from the Trial Innovation Network, NCATS, or the NIH. Those adopting the resources for their local use are expected to appropriately cite the resources used in the toolbox and give full credit to the original developer, the contributor(s), as well as the Trial Innovation Network.

COLLABORATION WEBINAR

Addressing Health Disparities Among Under Included Older Persons: An Overview of the NIA Health Disparities Framework and Use-Case Examples of Its Principles in Action to Increase Interest in Clinical Research Participation Among Latino Populations

Marie Bernard, MD, Patricia Jones, DrPH, MPH, MS, Holly Massett, PhD & Melissa McGowan, MHS, CHES

The NIA staff will discuss some of the limitations with inclusion of diverse populations observed in clinical research and trials, the role federal science policy is playing in remedying the limitations and promoting more broad and consistent inclusion of communities of color in developing new strategies implemented to enhance inclusion among older persons of color. The NIA team will provide an overview of a Health Disparities Framework available to inform all stages of research from Basic Science to Population-health
